How many M.D.s and Ph.D.s are being trained on our NRSA T32 grants? This question is asked frequently of our office.		Sirkis, Elaine		
Is there anyway through our NIH data bases that we can request how many M.D.s and Ph.D.s are trained on all of our multi grant mechanisms? This is the sort of info we should have at our fingertips. 1) A column to list the highest degree received at the time of the appointment. It should appear as M.D., Ph.D., B.A., B.S., M.S.,etc. We enter the info from the 2271 and should be accessible. 2) We would like to run the report from inception to present or request certain years at a time; i.e., years 6–10. This is info that is usable on a daily basis. 3) Would it be possible to list how many predoc and postdoc slots have been awarded–not clumped together? This grant was awarded 4 predoc and 5 postdoc slots. The report shows under "Trainees" how many we have entered into the system and not the awarded number.		Sirkis, Elaine

Modify TA8070 to show the parent grant in the hit list, even if an amendment exists. Problem is that if there's an amendment, it's showing up instead of the parent. Require an explicit entry of the amendment for it to show up.		Carin Sprick
